See how Coupa Pay with
Barclaycard Virtual Cards can
provide greater efficiency,
visibility and control of your
business spend.

Three big benefits to your business

Speed up your payment process

Barclaycard Virtual Cards let you use a PO as the payable object instead of having to wait for any invoices to be approved. It means you can cut out those extra-slow approvals and fuel your fast-paced business. And being powered by Barclaycard† means you have access to the major currency types of USD, Euro and GBP for a straightforward payment solution.

Take back visibility and control

Get tighter control over your business spend by pre-approving suppliers and exact transaction amounts before they happen. You'll be able to track all your payments for a clearer view of your cashflow.

Make reconciliation a breeze

Automatic reconciliation helps speed up the usual painstaking reconciliation process. There's no need to match up paper receipts – you'll be able to quickly reconcile payments against the PO using information already in Coupa. And you won't have to on-board suppliers for one-off transactions either.

Pay on invoice now available.

Simple steps to better payments

1. Use a Requisition to quickly request a virtual card.

2. Once approved, a PO is created – Coupa generates a unique one-time credit card number for the authorised supplier and amount.

3. It automatically reconciles the charges and statements back to the PO – so you can keep track of everything.

" Having our payment platform within the Coupa environment means that people can stay in Coupa. For suppliers, being able to receive a payment at the point they receive a PO is absolutely critical for supporting the supply chain. "

Rob Tuckwell, Director of Partnerships and B2B, Barclaycard

" We have provided customers with an integrated and unified experience – an experience of bringing payments at the time of procurement in one system, powered through virtual cards provided by Barclaycard. "

Rajiv Ramachandran, VP, Product Strategy and Management, Coupa Pay
