

# Barclaycard Precisionpay Go with Apple Pay

With our virtual card solution, you could gain more control and visibility over your employees' ad hoc business payments, whilst handing them flexibility, convenience and speed.

Powering change through payments

## What's a virtual card?

A virtual card is a temporary card that's generated at the request of a registered employee, whenever they need to make a business payment – whether that's online or on the go. Your business has more control and greater visibility over spend – allowing you to limit the amount that employees can spend using the virtual card and the timeframe it can be used for. Although they're single-use, if multiple virtual cards were used by an employee on the same trip or project, these can be grouped together for easier reconciliation.

## How does Barclaycard Precisionpay Go work?

With our app-based virtual card solution, Precisionpay Go, your employees can request a virtual Visa card on their iPhone or iPad. They specify the amount needed and how long it's needed for, and we'll create the card instantly (subject to workflow approvals you may have added) – they can then add their virtual Visa card to their Apple Wallet.

Employees can use the virtual Visa card to make business payments both online and on the move with Apple Pay – a safer, more secure and private way to pay – wherever they see these symbols:

## More flexibility for employees who travel for business

Ability to access virtual Visa cards instantly via Precisionpay Go – with no waiting for a physical corporate card to be delivered.

Allows employees to make ad hoc business payments whenever and wherever it suits them, both online and with Apple Pay.

No need to use personal cards for B2B purchases or to claim back expenses.

## More control and visibility for your business

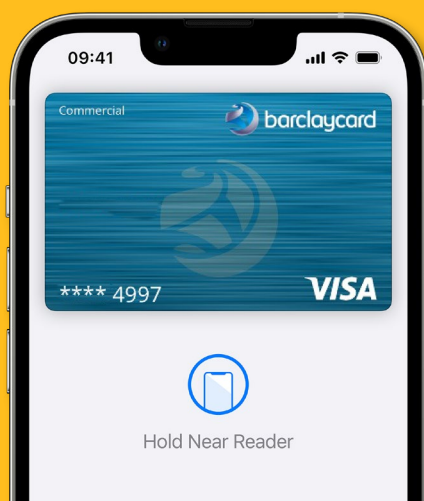

Provides greater payment flexibility – allowing ad hoc B2B spend without needing to issue a physical corporate card.

Increases visibility over employees' ad hoc B2B spend, through dedicated online control portals.

Helps to reduce environmental impact by eliminating the need for physical plastic cards.

## Gain more control and greater visibility

Your business will have access to dedicated control portals\*:

- **The Precisionpay Go Control Portal** – admins can choose which employees to extend the solution to, whether they want to issue virtual Visa cards or allow employees to create their own, set up workflow approvals, configure the programmes, and more
- **Precisionpay Reporting** – admins can keep track of their employees' spending and receipts which can be added to the app

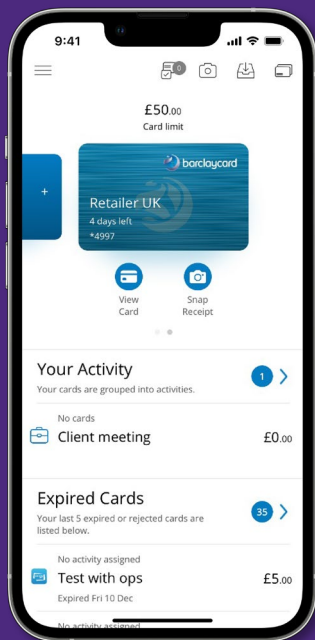

\*The Precisionpay Go app works only on Apple iPhone and iPad (iOS version 11 or later). The Precisionpay Go app can only be downloaded from a number of international app stores and must be connected to Wi-Fi or cellular networks when using the app. Precisionpay Go supports GBP, USD and EUR currencies, and is exclusively available with Visa. Virtual cards generated through Precisionpay Go can be used for eCommerce transactions or Apple Pay transactions. T&Cs apply. The approval of your application depends on financial circumstances and borrowing history.

# Powering change through payments

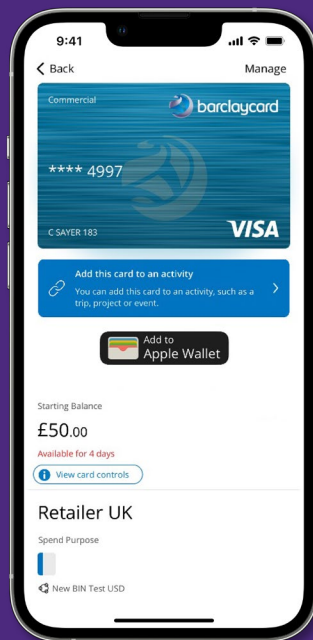

Here's what to expect

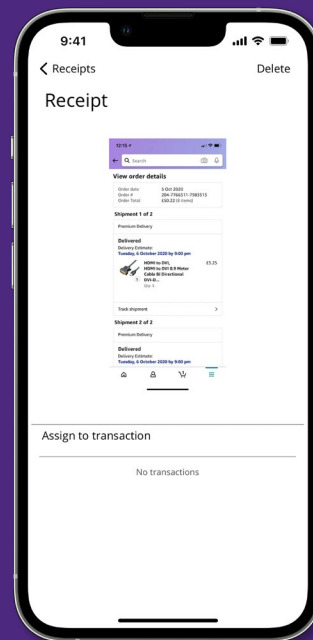

VISA

Clearly view all available and expired cards

Quickly check the details of specific virtual Visa cards

Attach the receipt easily once a purchase has been made

Look back at past transactions to stay in control of spending
